# Highway Construction Costs Continue to Rise at 9.6% Annual Rate

# OCTOBER 1, 2024|JEFF DAVIS

calendar year 2024, at an annualized rate of 9.6 percent (a 2.4 percent increase over the last quarter of calendar year 2023). The Federal Highway Administration reported this week that highway construction costs rose again in the first quarter of

when it replaced the old Bid-Price Index The National Highway Construction Cost Index (NHCCI) is maintained by FHWA and updated quarterly. It dates back to 2003,

growth of 15.2 percent per year, but the chart on the FHWA website shows that there were three general phases to this: they were when the NHCCI started at level 1.0000 in January-March 2003. Over 21 years, that translates to an average index The January-March 2024 NHCCI was 3.1908, when means that highway construction costs were 3.19 times higher then than

- Rapid growth from the start of the index, peaking at the onset of the financial crisis in July-September 2008
- A ten-year lull, where costs decreased and then took until July-September 2018 to get back to the July-September 2008 level; and
- Skyrocketing costs starting during the recovery from COVID and continuing almost unabated since then.

what has happened since: The last trough on the FHWA chart bottomed out in the October-December 2020 quarter, when NHCCI was 1.8601. Here is

Quarter	NHCCI	Q over Q Incr.	Annualized
Oct-Dec. 2020	1.8601		
JanMar. 2021	1.9112	+2.74%	+10.98%
