Item #7 on the agenda was the updates on air quality by TDEC. Mr. Corrigan was unable to attend but sent information on grants for medium and heavy-duty vehicle projects under VW-Environmental mitigation Trust. ## **RESOLUTION 2025-14**

### **APPROVING AMENDMENT KYTC #6 TO THE FY2023-FY2026 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) OF THE CLARKSVILLE URBANIZED AREA METROPOLITAN PLANNING ORGANIZATION (MPO)**

**WHEREAS**, the Transportation Improvement Program (TIP) is prepared on a four-year basis, per the Infrastructure Investment and Jobs Act (IIJA), also referred to as the Bipartisan Infrastructure Law (BIL), with amendments prepared on an as needed basis. This process is in place to document the cooperatively developed program of projects recommended by the Technical Coordinating Committee (TCC) for selection by the Executive Board to be advanced during the program period; and

**WHEREAS**, to amend the FY2023-FY2026 TIP for the addition of the category titled “Electric Vehicle (EV) Charging Stations Installation” to the Kentucky Grouped Projects List, with a funding amount of \$70,346.00 on page 32 of the TIP. This is needed for the NEVI awarded station at 18750 Herndon-Oak Grove Road (Site ID: I24-086; Pilot Truck Stop) for 2025. The total cost of \$70,346.00; the federal funding amount is \$28,842.00 and the private match from the developer is \$41,504.00; and

**WHEREAS**, the locally developed Participation Plan has been followed. The 14 - day public review period began on June 25, 2025 and ended July 9, 2025. Said document was made available for review; and

**WHEREAS**, members of the TCC did acknowledge re-demonstration of fiscal constraint and recommended approval for Amendment KYTC #6 to the Executive Board;

**NOW, THEREFORE, BE IT RESOLVED**, that the Clarksville Urbanized Area Metropolitan Planning Organization’s Executive Board does adopt Amendment KYTC #6 of the FY2023-FY2026 TIP.

**Resolution Approved:** July 10, 2025

Clarksville MPO Executive Board

**1.11b KYTC Grouping:**

For the reasons noted above, KYTC and the Clarksville MPO have developed streamlined procedures for incorporating such projects into the TIP. Instead of being identified individually, these projects are grouped into project categories. By listing these grouped projects in the TIP, planning process stakeholders and the general public are informed of the types of potential projects that may be implemented in the Kentucky portion of the Metropolitan Planning Area without modifying the TIP to individually identify such projects. With respect to fiscal constraint for Kentucky grouped projects, it should be noted that dollar amounts do not reflect actual funding levels, but are intended only to provide an illustrative estimate of the amount of funds that might be spent in each grouped projects category on an annual basis. Fiscal constraint for Kentucky grouped projects is maintained by KYTC on a statewide level and is demonstrated on an annual basis for the Statewide Transportation Improvement Program.

Individual projects from grouped project categories will be incorporated into the MTP and/or TIP by Administrative Modification as they are defined (in terms of project description, scope, and cost) and approved. Allowing such MTP and TIP changes to be made by Administrative Modification, rather than Amendment (and the corresponding requirement for public review), simplifies and streamlines MTP/TIP maintenance and project approval processes.

Grouped project categories utilized by the Clarksville Urbanized Area MPO for KYTC are shown below in Figure 14. The list of grouped projects utilized here is recommended by KYTC. By listing these project types in the TIP, planning process stakeholders and the general public are informed of the types of potential projects that may be added to the TIP in the future via streamlined procedures. TIP actions for these projects will not require additional public review, demonstration of fiscal constraint, or a conformity determination (if applicable).

## **RESOLUTION 2025-15**

### **APPROVING AN UPDATE TO THE CLARKSVILLE URBANIZED AREA FUNCTIONAL ROADWAY CLASSIFICATION NETWORK**

**WHEREAS**, the Federal-Aid Highway Act of 1973 required the use of functional highway classification to update and modify the Federal-Aid Highway System by July 1, 1976. This legislative requirement is still effective today; and

**WHEREAS**, the functional classification is the process by which streets and highways are grouped into classes or systems according to the character of services they are intended to provide. Basic to this process is the recognition that individual roads and streets do not serve travel independently in any major way. Rather most travel involves movement through a network of roads; and

**WHEREAS**, the functional classification defines the nature of this channelization process by defining the part that any particular road or streets should play in serving the flow of trips through a highway network; and

**WHEREAS**, the functional classification network within the Tennessee side of the Clarksville MPO's metropolitan planning area needs to be updated per TDOT. A complete network reset will be performed by TDOT; and

**WHEREAS**, the Technical Coordinating Committee members do agree said action is needed to update and modify the functional classification system to reflect transportation needs and safety issues of the Tennessee portion of the MPO; and

**NOW THEREFORE BE IT RESOLVED**, that the Metropolitan Planning Organization's Executive Board approves the update to the Functional Roadway Classification Network within the Tennessee portion of the MPO.

### **APPROVING A RECLASSIFICATION TO THE CLARKSVILLE URBANIZED AREA FUNCTIONAL ROADWAY CLASSIFICATION SYSTEM**

**WHEREAS**, the Federal-Aid Highway Act of 1973 required the use of functional highway classification to update and modify the Federal-Aid Highway System by July 1, 1976. This legislative requirement is still effective today; and

**WHEREAS**, the functional classification is the process by which streets and highways are grouped into classes or systems according to the character of services they are intended to provide. Basic to this process is the recognition that individual roads and streets do not serve travel independently in any major way. Rather most travel involves movement through a network of roads; and

**WHEREAS**, the functional classification defines the nature of this channelization process by defining the part that any particular road or streets should play in serving the flow of trips through a highway network; and

**WHEREAS**, the functional classification changes affect the following roadway within the Tennessee portion of the MPO: adding Hazelwood Road for 1.985 miles, from Needmore Road to Trenton Road as a minor collector, which is shown on the attached map; and

**WHEREAS**, the Technical Coordinating Committee members do agree said action is needed to update and modify the functional classification system to reflect transportation needs and safety issues along Hazelwood Road; and

**NOW THEREFORE BE IT RESOLVED**, that the Metropolitan Planning Organization's Executive Board approves the functional classification change on the Functional Roadway Classification System within the Tennessee portion of the MPO.
